Cypress

#### Backend

Python

NoSQL

SQL

#### Google

Google API

Google Maps

Google Cloud

#### Web Design

Figma

Adobe XD

Adobe Ps/Ai

# WORK EXPERIENCE

## Navagis

[navagis.com](http://navagis.com)

**Position:** Solutions Developer

**Duration:** Feb 2023 – Jan 2024

### PROJECT HIGHLIGHTS

**Project Name:** Project Gulliver

**Project Link:** [221616.com/maps/](http://221616.com/maps/)

**Tools and Technologies:** Google Cloud, Google APIs, NextJS (React)

**Role/Contributions:**

*Project Gulliver is an application for a car import-export company in Japan. I am one of the main frontend developers who implemented the app's features which include displaying: (1) the list of the client stores, (2) store locations as markers on the map, (3) and individual store information such as address, contact details, and inventory.*

**Project Name:** Project CLAUD

**Project Link:** <Internal>

**Tools and Technologies:** Google Cloud, Google APIs, Angular, Python

**Role/Contributions:**

*Project CLAUD is an internal application for a real estate company in the Philippines. It is a web-based app for land assets management where I mainly worked on the "upload" feature of the system. User can upload CSV, shape files, and GeoTIFF images. The system will then ingest the data and display it on the map with computed analytics and information (e.g. estimated price value of the land, nearby landmarks, selling offers, etc.).*

## Iridium Technology / BigHand

[www.iridium-technology.com](http://www.iridium-technology.com)

**Position:** Frontend Developer

**Duration:** Oct 2020 – Feb 2023

### PROJECT HIGHLIGHTS

**Project Name:** OMEGA

**Project Link:** <Internal>

**Tools and Technologies:** Angular, C#, Visual Studio, MS SQL

**Role/Contributions:**

*OMEGA is a Business Intelligence (BI) product catered for legal and professional services firms. As part of the frontend development team, my primary focus is on the app's user interface and user experience. My contributions include (1) coding and enhancing graphs, charts, tables, dashboards; (2) bug fixing, and (3) implementing unit and end-to-end tests. I also made design assets for the application.*

## Mugna Tech

[mugna.tech](http://mugna.tech)

**Position:** Full Stack Developer

**Duration:** May 2020 – Oct 2020

### PROJECT HIGHLIGHTS

**Project Name:** iRazoo

**Tools and Technologies:** Django (Python), AngularJS, React, Docker

**Role/Contributions:**

*I worked on a short-term project of upgrading a legacy web application. My tasks include updating the app's Python and Django versions, cleaning and rewriting deprecated code, containerizing the application using Docker, and resolving bugs. I have also contributed on the frontend transition from AngularJS to React.*

# WORK EXPERIENCE

## Ingenuity Software

[ingenuity.ph](http://ingenuity.ph)

**Position:** Backend Developer

**Duration:** May 2020 - Oct 2020

### PROJECT HIGHLIGHTS

**Project Name:** Flyt

**Project Link:** <Internal>

**Tools and Technologies:** Odoo (Python), AngularJS, Docker

**Role/Contributions:**

*I am part of the backend development team that builds ERP systems for the company's customers. Our web application helps local businesses manage their inventory, payroll, HR, and other business-related information. I mainly worked on project maintenance, bug fixing, and doing feature requests from the clients.*

## Freelance

**Duration:** May 2020 - Oct 2020

### SOME PROJECTS:

- Creating websites using CMS (WordPress, Shopify, Squarespace)
- Web administration and design
- Database administration (MySQL, PostgreSQL)
- Data scraping tasks using Python/PHP
- Onsite SEO improvement
