College
University of the Philippines
BS Computer Science | 2013 - 2017

TECHNICAL EXPERTISE

Core Skills

 Angular

 Node.js

Other Tools

Frontend

React	TypeScript	Tailwind
RxJs	NgRx	Cypress

Backend

Python	Postgres	MongoDB

Google

Google API	Google Maps	Google Cloud

Extra

Figma	Docker	Firebase

WORK EXPERIENCE

Navagis

navagis.com

Position: Solutions Developer

Duration: Feb 2023 - Jan 2024

PROJECT HIGHLIGHTS

Project Name: Project Gulliver

Project Link: 221616.com/maps/

Tools and Technologies: Google Cloud, Google APIs, Next.js (React)

Role/Contributions:

Project Gulliver is a Google Cloud-based store-locator application for a car import-export company in Japan. I played a key role in implementing features such as displaying the store branches on the map, detailed directions, store information, inventory status, and operating hours.

Project Name: Project CLAUD

Project Link: ‹Internal›

Tools and Technologies: Google Cloud, Google APIs, Angular, Python

Role/Contributions:

Project CLAUD is an internal application for a real estate company in the Philippines. I was given a short-term task to implement a feature that allows users to upload geodata-related files (e.g. CSV, shape files, GeoTIFFs) which the system will ingest to display computed analytics and information such as estimated price value of the land, nearby landmarks, and selling offers.

Iridium Technology / BigHand

www.iridium-technology.com

Position: Frontend Developer

Duration: Oct 2020 - Feb 2023

PROJECT HIGHLIGHTS

Project Name: Iridium BI

Project Link: Product Page

Tools and Technologies: Angular, Cypress, C#, MS SQL

Role/Contributions:

Worked on a product that provides law firms with customizable cubes and dashboards. I collaborated with cross-functional teams to maintain and enhance features that focus on dynamic forms, graphs, charts, and datatables. Additionally, I handled automated unit and end-to-end testing and made design assets for the application.

Mugna Tech

mugna.tech

Position: Full Stack Developer

Duration: May 2020 - Oct 2020

PROJECT HIGHLIGHTS

Project Name: iRazoo

Tools and Technologies: Django (Python), AngularJS, React, Docker

Role/Contributions:

I worked on a short-term project of upgrading a legacy web application. My tasks include updating the app's Python and Django versions, cleaning and rewriting deprecated code, containerizing the application using Docker, and resolving bugs. I have also contributed to the frontend transition from AngularJS to React.

WORK EXPERIENCE

Ingenuity Software

ingenuity.ph

Position: Backend Developer

Duration: Oct 2018 - Apr 2020

PROJECT HIGHLIGHTS

Project Name: Flyt

Project Link: <Internal>

Tools and Technologies: Odoo (Python), AngularJS, Docker

Role/Contributions:

As part of the backend development team, I contributed to building ERP systems for the company's customers, which help them manage inventory, payroll, HR, and other critical business functions. My primary responsibilities include maintaining the project, fixing bugs, and implementing feature requests from clients.

Freelance

Duration: Aug 2017 - Sep 2018

SOME PROJECTS:

• Creating websites using CMS (WordPress, Shopify, Squarespace)

• Web administration and design

• Database administration (MySQL, PostgreSQL)

• Data scraping tasks using Python and PHP

• Onsite SEO enhancement
